

Overview

Dataset statistics

Number of variables	6
Number of observations	1035
Missing cells	792
Missing cells (%)	12.8%
Duplicate rows	0
Duplicate rows (%)	0.0%
Total size in memory	48.6 KiB
Average record size in memory	48.1 B

Variable types

Categorical	1
Numeric	5

Alerts

orbital_period is highly correlated with mass	High correlation
mass is highly correlated with orbital_period	High correlation
method is highly correlated with distance and 1 other fields (distance, year)	High correlation
distance is highly correlated with method	High correlation
year is highly correlated with method	High correlation
orbital_period has 43 (4.2%) missing values	Missing
mass has 522 (50.4%) missing values	Missing
distance has 227 (21.9%) missing values	Missing
orbital_period is highly skewed ($\gamma_1 = 24.27306658$)	Skewed

Interactions

Correlations

Missing values

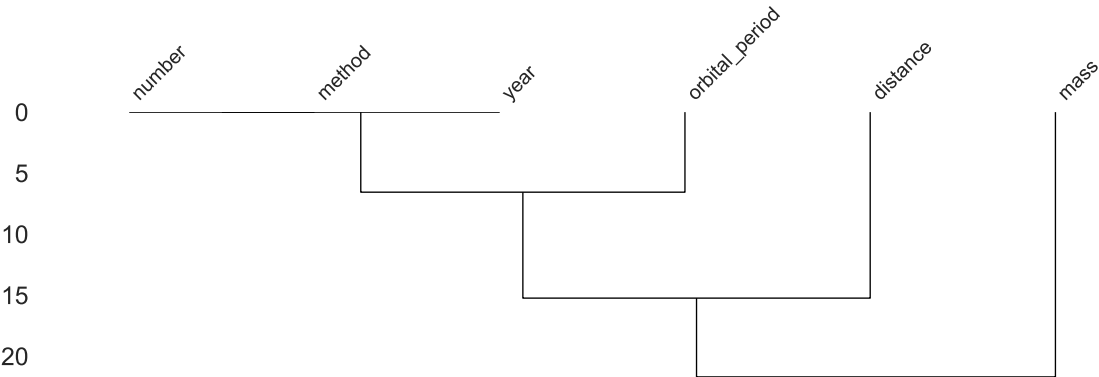

A simple visualization of nullity by column.

Nullity matrix is a data-dense display which lets you quickly visually pick out patterns in data completion.

The correlation heatmap measures nullity correlation: how strongly the presence or absence of one variable affects the presence of another.

The dendrogram allows you to more fully correlate variable completion, revealing trends deeper than the pairwise ones visible in the correlation heatmap.
